## P R E F A C E

With the advance in agricultural methods going on from end to end of Canada the demand for pure bred sires is correspondingly increasing. Many Western ranchmen finding it difficult and expensive to purchase good pure bred males have to continue year after year the use of grades reared in their immediate vicinities.

In the older provinces large numbers of grade and even "scrub" sires of all classes of stock are yet employed. The awakening that is taking place through the agency of Farmers' Institutes and Agricultural fairs is encouraging the demand for pure bred sires. Many are exhibiting a desire to secure one or more pure bred females as foundation for more profitable herds, studs and flocks. In many sections the improved animals are procurable in one's immediate neighbourhood or a few miles away. Even under such circumstances persons frequently prefer to purchase from a distant neighbourhood or province. The conditions spoken of have impressed themselves on the Live Stock Commissioner by very frequent inquiries as to where pure bred animals of certain breeds may be procured. Requests from foreign countries for similar information are each year growing larger indicating a hopeful sign of the times for the Canadian growers of pedigreed stock.

The edition of the Directory issued in 1901 has served a useful purpose, but the enormous growth of the pure bred stock interests and the many changes in the personnel of Canadian stockmen have rendered a new issue necessary.

In order to include as far as possible all the breeders of Canada likely to have pure bred animals for sale each year circulars were sent out to those whose names could be obtained through the National Live Stock Records Office and otherwise, and to those who failed to reply, later circulars were sent. Much careful work has been expended in the collecting and compiling of the information published in this Directory.

Copies will be sent to ranchmen, stock breeders, secretaries of Farmers' Institutes, Agricultural Societies, Live Stock Associations and others who may apply for them or for addresses of breeders from time to time.

J. G. RUTHERFORD,  
Live Stock Commissioner.

LIVE STOCK BRANCH,  
DEPARTMENT OF AGRICULTURE,  
OTTAWA.

Canada - Agric. Dept. S.

## S U M M A R Y

---

The returns included in this directory have been summarized in the following tables. While the enumeration is much more complete than was shown in the first edition of this directory, it is not claimed that it represents anything like a complete tabulation of the pure-bred live stock in the Dominion. It does, however, represent a large per centage of the studs, herds and flocks, as well as to afford an approximate estimate of the relative proportion in which the various breeds of horses, cattle, sheep, swine and goats are distributed throughout the different provinces.
